

ALI 2.112 COMPACT MAGNETIC BRACKET

Four powerful magnets provide quick, easy mounting and adjustment of measurement components, even on narrow coupling flanges.

ALI 2.170 to ALI 2.174 SUPPORT POSTS

For mounting measurement components on brackets. Available in 115mm, 150mm, 200mm, 250mm, 300 mm, 400mm and 495mm.

ALI 2.114 to ALI 2.116 CHAINS

Available in 300mm, 600mm and 1500mm.

ALI 2.230-1 MAGNETIC SLIDING BRACKET

For performing measurement and alignment on non-rotatable shafts.

A high quality surface finish is required on shafts/couplings to obtain good results. Suitable for shaft/coupling diameters from approximately 80mm and above.

ALI 2.761 iS BOLT HOLE BRACKET

This bracket can replace compact chain type brackets, excellent for large couplings, or when there is limited clearance around the coupling.

ALI 2.109 EXTRA THIN BRACKETS

Only 8mm thick, these brackets offer the ideal solution to those tight squeeze situations. Various sizes available.

ALI 2.893 CARDAN SHAFT BRACKETS

Universal mounting for cardan shafts. These brackets are suited to the Rotalign Ultra iS and Rotalign Touch units.

These brackets allows for cardan shafts to be aligned without removing the shafts.
